

Certificate

This is to certify that

Name: **Gabor Roza** GDC No:

Attended

Soft Tissue Masterclass with Ricardo Kern On: **2nd-4th November 2023** **Lowry Hotel, Manchester**

Learning Content

All aspects of soft tissue management covered, both around natural teeth and dental implants.

Aims and Objectives

- › The pink and white aesthetic balance philosophy studied
- › Concepts for digital planning - Surgical aesthetic rehabilitation
- › Perfect team communication tools - From surgery to laboratory
- › Crown Lengthening "A to Z"
- › Influence of tissue design on restorative aesthetic results
- › Factors that affect precision
- › Factors that affect short term predictability and long term stability
- › Crown Lengthening conjugated with aesthetic restorative procedures:
Surgery, wax-up, mock-up, tooth preparation and restorative execution
- › Key Points for Immediate Implants Immediate Temporization in the Aesthetic Zone
- › From Biology to prosthetic management. Factors that affect stability of tissues around implants.
What may influence bone loss and periimplantitis development around implants,
- › Provisional design for immediate temporization in immediate implant cases and on grafted sites
- › Decision-making process:
how deep place implant platform x Abutment design anatomy of emergence profile
- › CT graft for immediate implants
- › Full maxilla implant, Soft tissue graft, temporization and conditioning cases

Development Outcomes

This CPD course meets the criteria for the GDC'S development outcomes C

We confirm that the information provided here is full and accurate:
